

## Program Release Notes v2.0.10

On 1 July 2020, MilitaryChildCare.com (MCC) was upgraded to include several enhancements. The enhancements are summarized in the table below. Additional details about each enhancement are included in subsequent sections of this document.

Enhancement Area	Details
Reconfirm Turned On	The reconfirm process will be turned on and families that are 45 days from the Date Care Needed (DCN) or 60 days after DCN will be placed into a reconfirm cycle.
Collect Where Child Receives Care	<p>The system will collect information on where children are currently receiving care for applicable care types. Applicable care types include 24/7, Full-Day Care, School Year Care (Before/After School, Before/After School – Kindergarten and Full-Day Kindergarten).</p> <p>The system will not collect information on where children are currently receiving care if the care type is for Summer Camp, Part-Day Care, Extended Care, Enrichment Care, School Year Care (School Out Only and/or Seasonal Camps, School Out Only and/or Seasonal Camps – Full-Day Kindergarten, School Out Only and/or Seasonal Camps – Kindergarten).</p>
Reconfirming Care and Collecting Where Child Receives Care	When reconfirming care, a family or program user on behalf of a family will be prompted to select or update where the child is receiving care for applicable care types.
Where Children with Unmet Need are Receiving Care Report	At the time of the release, the Where Children with Unmet Need are Receiving Care Report will be taken offline to conduct some additional analysis on the data.

## Collect Where Child Receives Care

Families, and program users acting on behalf of a family, will be prompted to select where their child is currently receiving care when they make a request for an applicable care type and the DCN is within 30 days, or when they reconfirm. Once an offer is made for an applicable care type, and the offer is accepted and completed with a start date, the system will update the current care for the child to the program or provider where the offer was made.

1. When placing a new request with a DCN within 30 days, a family must select where their child is currently receiving care. A program user will provide the information when creating a request on a family's behalf.

**I understand and agree to the following:**

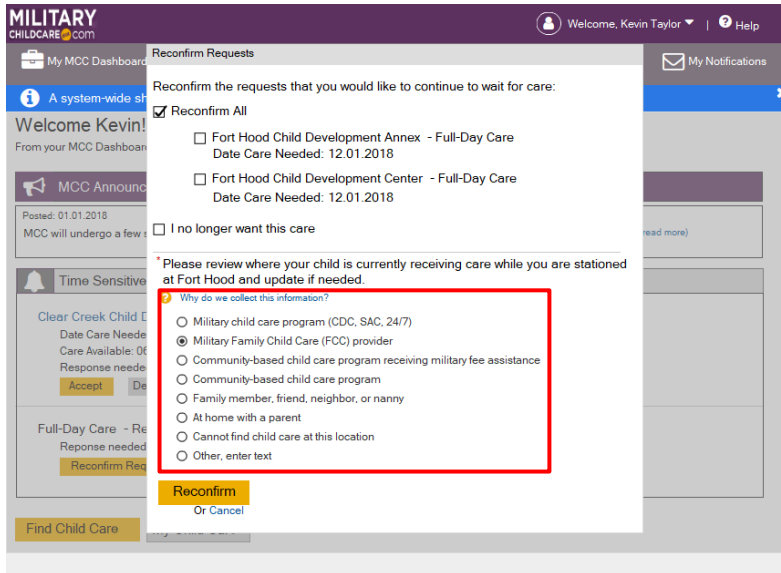

I will ensure my email address is current and will check for and review email notifications about the status of my request(s) for care.

I will provide eligibility verification documents prior to enrollment.

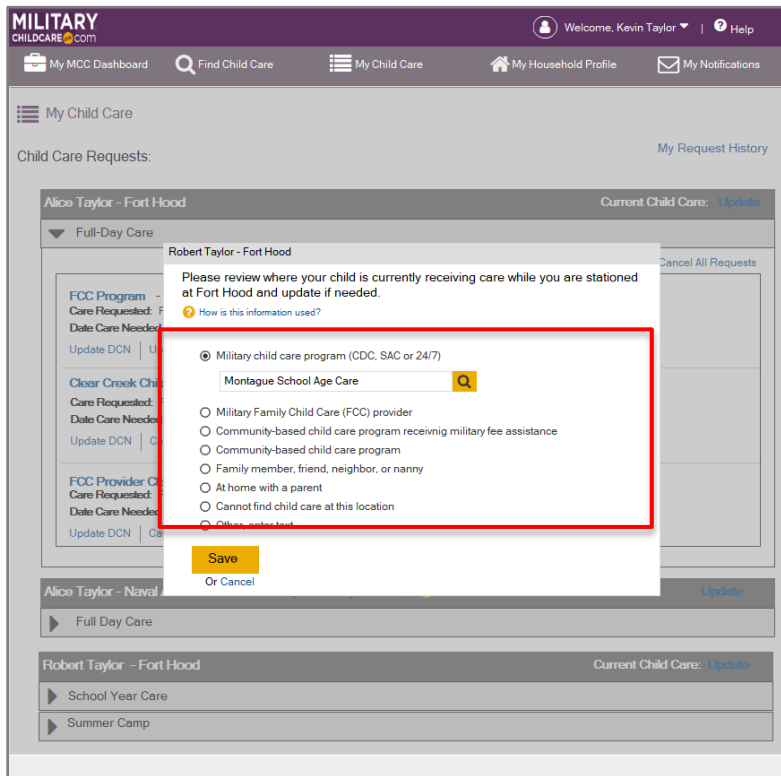

Anticipated Placement Time (APT) is an estimate of how long families can expect to wait for a child care space in the requested program. APT is not a guaranteed placement time and may be modified as a result of changes to the request (e.g., an update to the date care needed or a change in family type) or circumstances at the program.

- 2. A family must review and update where their child is currently receiving care for an applicable care type with each reconfirm cycle if the family is reconfirming requests.

- 3. A family can review and update where their child is currently receiving care from their My Child Care page for an applicable care type. A program user, on a family's behalf, can review and update the information in Manage Care.

## 4. Program users can see where a family is currently receiving care in the History Log.

The screenshot displays the Military Child Care (MCC) system interface. At the top, the header includes the logo for Military ChildCare.com, a user profile for Meagan Kinsey, and navigation links for My MCC Dashboard, Reports, Management, Setup, and Support. Below the header, a navigation bar contains tabs for Household Profile, User Account, Manage Care (highlighted), History, and Notifications. The main content area shows 'Child Care Requests' with an 'Add Request' button. A dropdown menu for 'Alice Taylor - Fort Hood' is open, showing 'Full-Day Care' as the selected category. A modal window titled 'Alice Taylor: Clear Creek Child Development Center for Full-Day Care' is displayed, containing a table of request history. The first row in the table is highlighted with a red box.
